## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Hutchin (US 4,725,146).

Regarding claim 1, Hutchin teaches determining a progression of the position of a reference object passing through a process (column 1, lines 42-51); forming differences of positions between the object and the reference object (column 2, lines 52-55); forming error position terms from the differences (column 7, lines 14-17); and weighting the error position terms with at least one correction factor (column 7, lines 17-19).

### ***Allowable Subject Matter***

Claims 2-5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter:

The primary reason for the indication of allowable subject matter is the inclusion of the limitation that the error position terms weighted with the correction factors are added up. It is

Art Unit: 2863

this limitation in the claimed combination that has not been found, taught, or suggested by the prior art of record that makes these claims allowable.
